AI In General

AI Text?

53.5%

From Graphite.io, based on 70,000 articles

“The length of tasks AI can do is **doubling every 7 months.**” – METR

“Win Nobel Prizes on its own as early as **2027 or 2028**” – Anthropic

AI in Education (AIED)

Pros

- Personalized learning
- Instant feedback
- Support for teachers
- Accessibility support

Cons

- Overreliance
- Academic dishonesty
- Inaccurate information
- Privacy
- Bias
- Loss of human interaction

Current Policy

- SB 1711
- HB 0531 (Proposal)

Current Policy

- **Ohio**
- Like Tennessee, Ohio requires districts to create AI policies but does not provide standardized statewide rules.
- **Connecticut**
- Connecticut emphasizes pilot programs and evidence collection before AI adoption.
- **Colorado**
- Colorado focuses on building long-term AI integration through skills progression and planning frameworks.
- **Washington**
- Washington uses advisory boards and task forces to explore governance rather than enforce policy.

Core Problem

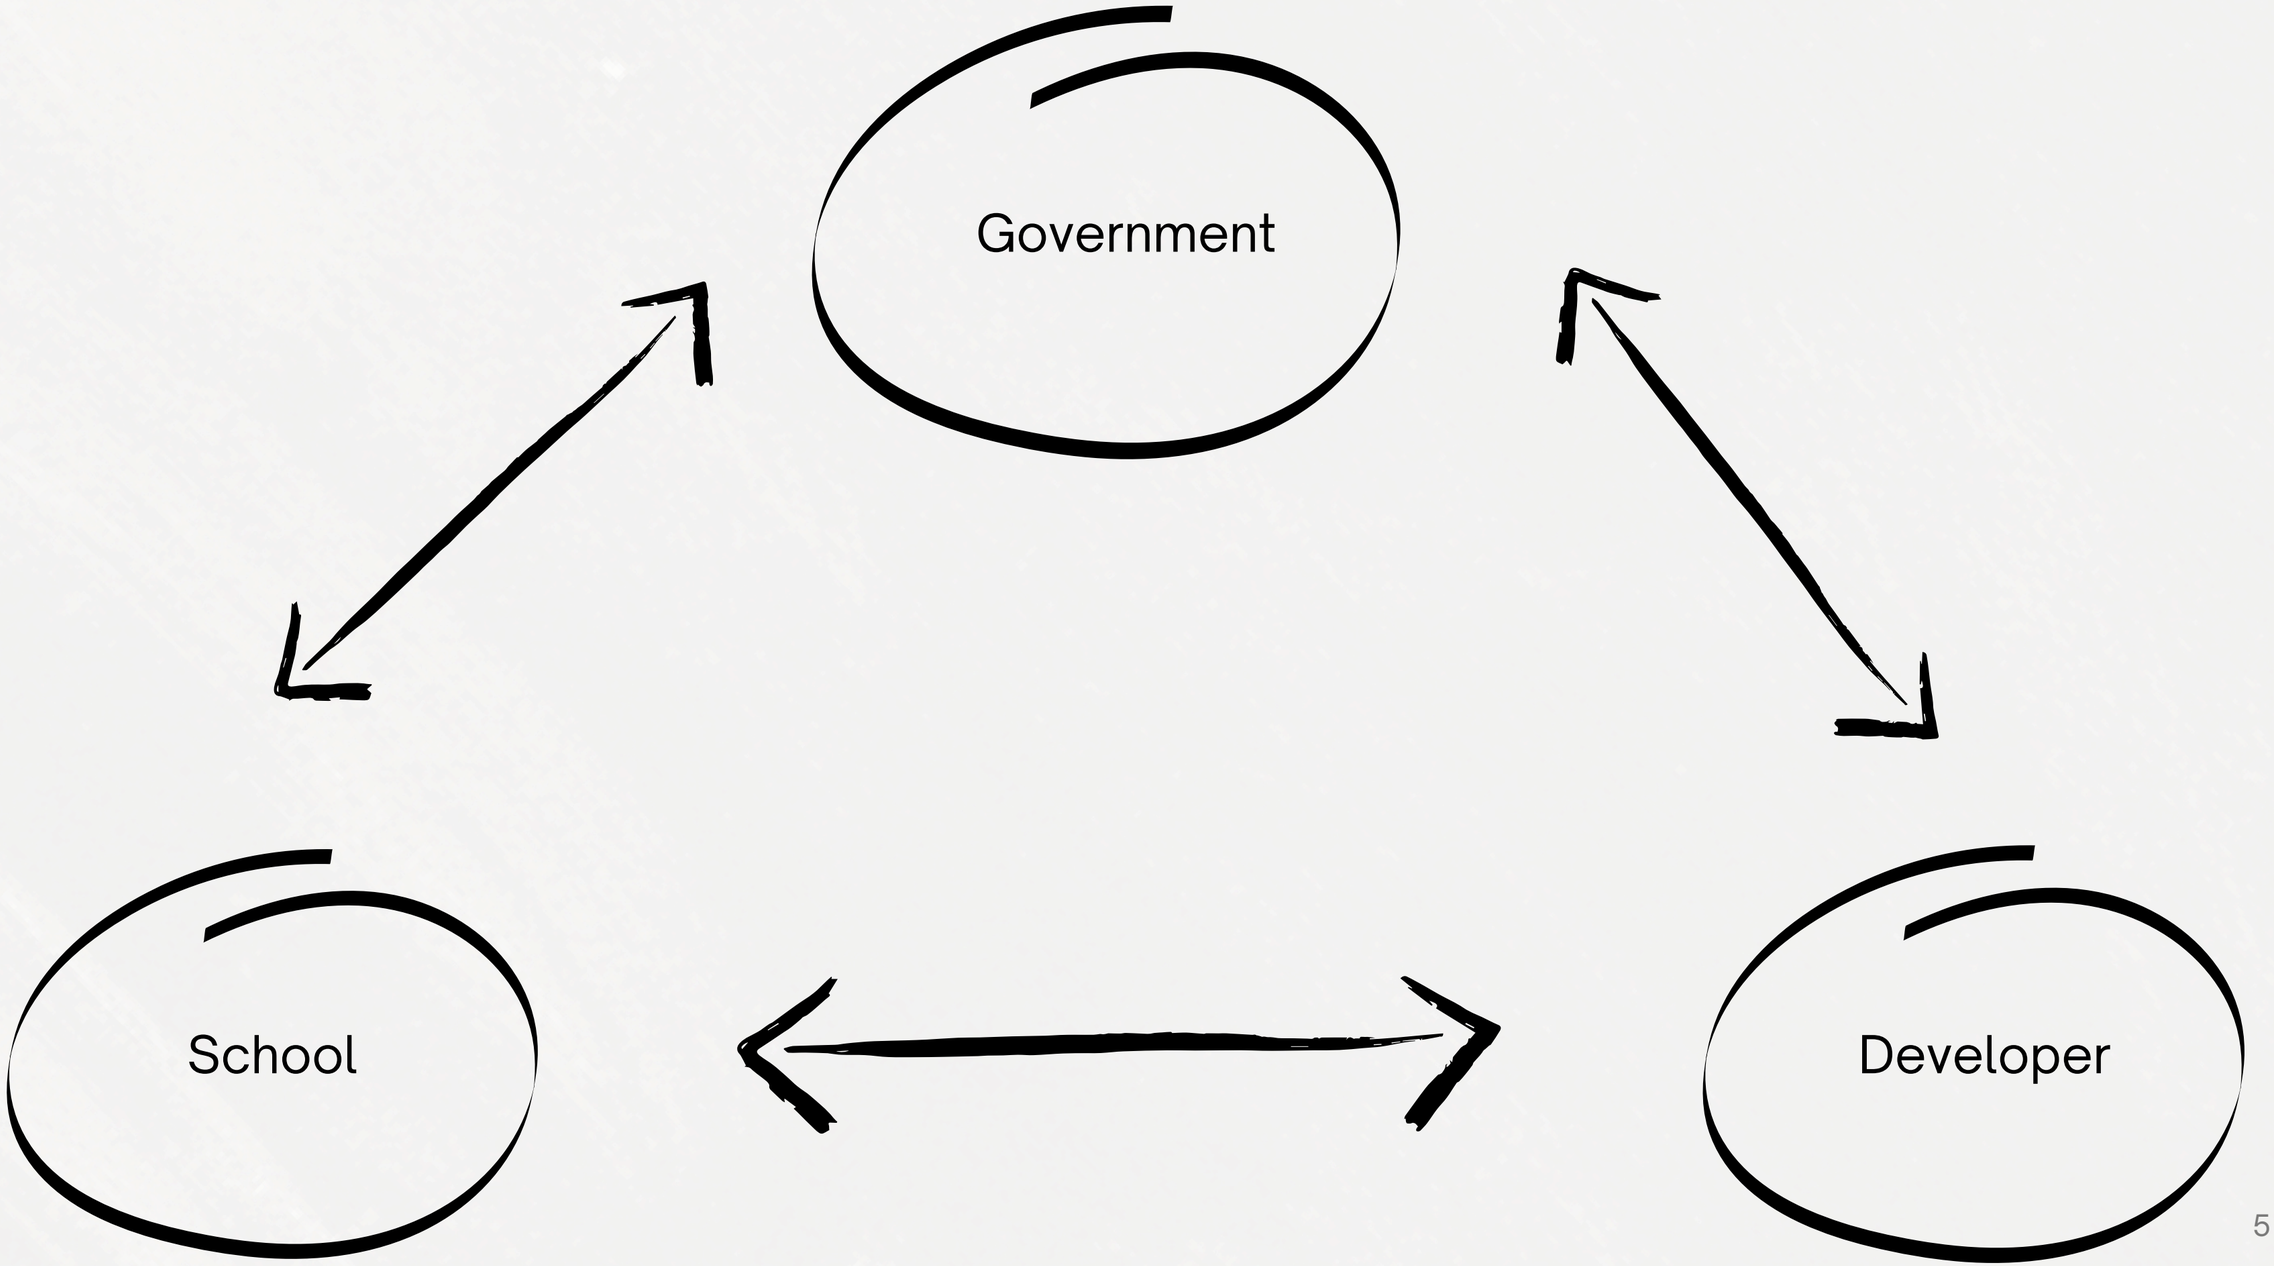

For the government:

- Distributed responsibility

For schools/individuals

- Inconsistent rules
- Trial-and-error burden
- Overreliance
- Fear of missing out
