EDUCATIONAL BACKGROUND

Cornell University (Cornell Tech) 08/2026 - 05/2027 (Expected)
Degree: Master of Engineering **Major:** Electrical and Computer Engineering
Vanderbilt University 08/2024 - 05/2026
Degree: Bachelor of Science **Major:** Computer Science **GPA:** 3.78

SKILLS

- Programming Languages: Python, Java, MATLAB, C#, C++
- Software Tools: MS Excel, Cursor, Unity, Figma, Git

INTERNSHIP

NetEase Hangzhou, China 06/2026 - 08/2026
Where Minds Meet Quality Assurance

- Conducted AI-assisted testing for an auto-battler mode in *Where Winds Meet*, and proposed ~250 bugs and suggestions on improvements, covering gameplay logic, player experience, balance, and feature functionality
- Created and renovated skills for agents, enabling match monitoring, automated risk early-warning, test-case generation, and large number probability verification
- Performed competitive analysis of similar games and evaluated gameplay mechanics with Figma-based documentation
- Collaborated with developers and designers throughout the release cycle, through SVN-based workflows.

Deloitte Beijing, China 07/2025 - 08/2025
Audit & Assurance

- Rapidly self-taught core auditing principles and contributed to annual audit deliverable by verifying inter-company accounts, consolidating large financial datasets, and preparing key reports for managerial review.

ChicPoint Hangzhou, China 12/2023 - 01/2024
Image Search Project Product Manager

- Developed an image search feature for the ChicPoint's app using the Google Vision API
- Conducted user-behavior research and development tool selection based on user data and competitive usability analysis on similar apps for designing feature prioritization
- Participated in prototyping and hands-on development, including building Python scripts for data processing
- Planned and executed the overall R&D plan for a 7-member team, defining milestones, allocating tasks and schedules.

PROJECTS

Multi-dimensional, Personalized Quote Library (https://www.pgwhitelib.com**)** 05/2025 - Present

- Built and maintained an end-to-end quote library (Nuxt+MySQL) with bilingual UI (zh/en), multi-axis filtering, and URL-synced search for shareable queries based on need-finding research and user interviews.
- Designed a normalized MySQL schema with entity–translation separation, enabling locale-aware content and search without duplicating core records
- Built automated ingestion via WeChat Reading's agent/skill APIs to batch-export the readers' own highlights accumulated over years of reading; ongoing work toward multi-user collaboration and recommendations driven by machine learning.

VR Project-Development of a Card Game (DeathSpire Codex) 08/2025 - 12/2025

- A multiplayer VR card game integrating AI-assisted development workflows, including AI-generated prototype models, animations, and iterative design support
- Developed in Unity with Meta XR building blocks, implementing state-machine for AI animation and decision making
- Led backend gameplay development including card refresh logic, AI path finding, and combat system design
- Built multiplayer functionality with Photon and maintained scalable, synchronized systems through structured architecture and detailed Git-based version control.

LEADERSHIP

Teaching Assistant, University of Rochester 01/2023 - 05/2023

- Designed and implemented personalized teaching methods to address individual needs and improve learning outcomes
- Compiled and presented teaching results and instructional approach at the end-of-semester symposium.

Honor of Kings Campus Ambassador 01/2025 - 07/2026

- Established and managed a Vanderbilt alumni network.
